

# QR Menu Implementation Checklist

---

## Before launch

- Menu has an HTML version, not only PDF or image
- QR code points to a stable URL
- URL is short enough to type manually
- Page loads quickly on mobile
- Menu is readable without pinch zoom
- Prices are visible
- Ordering path is clear
- Phone number is tappable
- Address is linked
- Last updated date appears

## Table signage

### Text:

Scan for the current menu.

Ask staff if you need a printed menu or help ordering.

## Accessibility

- Offer printed menus on request
- Ensure sufficient contrast
- Avoid tiny image-only menus
- Use descriptive link text
- Add alt text for dish photos
- Do not hide allergen information behind icons only

## Maintenance

### QR destination:

### Menu owner:

### Update schedule:

### Backup printed menu location:

### Last tested on iPhone:
